

Finomate®

EFLA®920 

Article No: 00 85 920

Product summary

- Green Mate extract (*Ilex paraguariensis* St. Hil.)
- Natural support for slimming
- Increases physical and mental performance
- Efficacy and safety supported by proprietary studies
- Unique standardization on 4 key components
- High degree of purity thanks to the patented EFLA®HyperPure process

Finomate® contributes to healthy body management and helps you feel more energetic.

Tradition and indication in traditional medicine

The leaves of the South American evergreen Mate tree (*Ilex paraguariensis* L.) have traditionally been used by natives since ancient times as a natural medicine for many purposes like appetite control, increase of renal water-excretion as well as stimulation of body and mind.

Scientific evidence

Scientific studies brought evidence for the health properties of green mate leaves. Therefore, the plant is described in several official standard works like the German Commission E, the British Herbal Compendium and the French Herbal Medicinal Guideline. According to these phytopharmaceutical references, green mate preparations can be used to treat mental and physical fatigue as well as to support weight loss and act as adjuvant in slimming regimes.

Our proprietary scientific results

Finomate® positively influenced fat percentage and body fat mass in a trial with overweight volunteers.

Finomate® effectively reduces body weight and visceral fat in *in-vivo*. Positive effects on biomarkers for obesity like cholesterol and free fatty acids were reported.

Finomate® significantly inhibited isolated human lipase *in-vitro*.
